

We won't speak about sport but about data and RDM

Research data management

Efficient planning and open FAIR data

Presentation distributed under a CC-BY license, ©Julien Colomb, available at <https://doi.org/10.5281/zenodo.1293376>

Congratulation !

congratulation you got a position at the HU, you are building your lab and will continue to do amazing science, with a growing team. Your team will produce data, probably a lot of data.

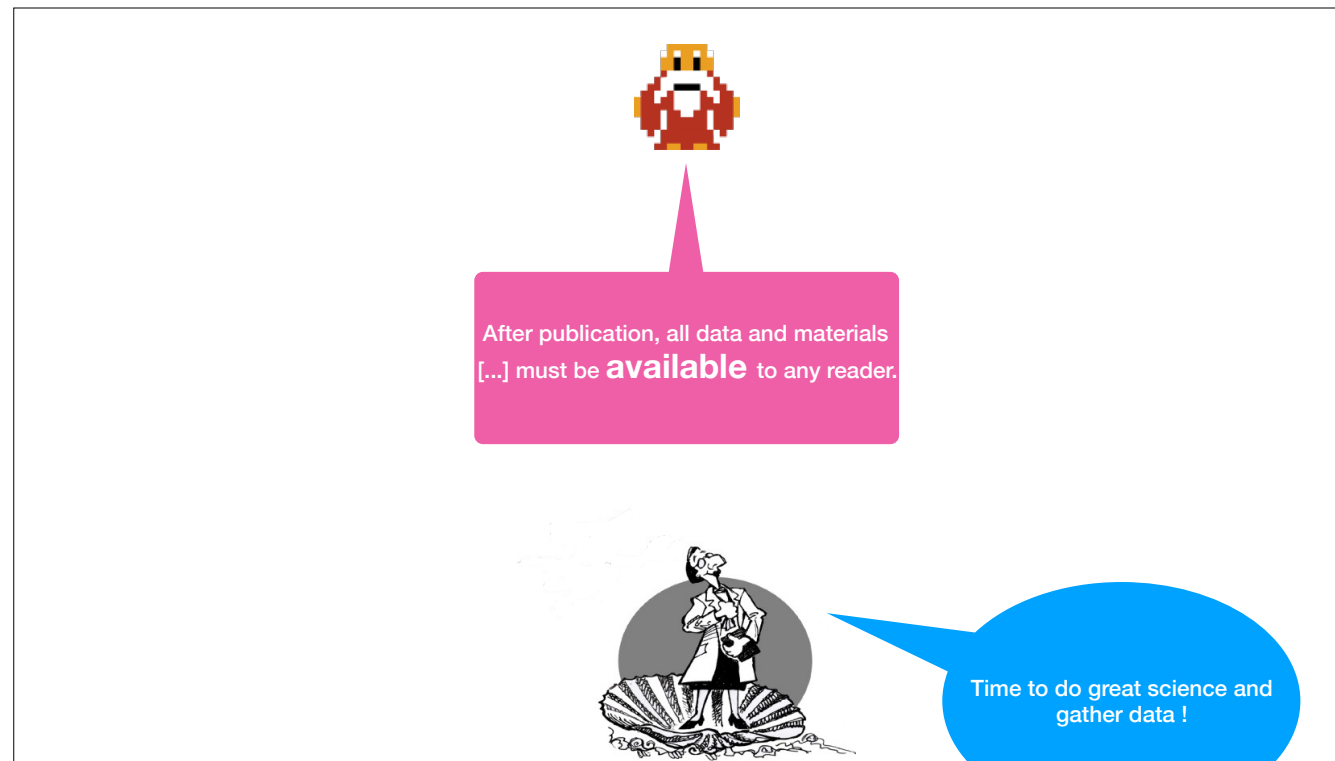

Time to do great science and
gather data !

Congratulation !

You may have heard from different sources that your research data should be open, in a state allowing re-use, and that it is actually your responsibility to achieve that. These requirements come from funders, publishers and universities alike!

BY THE WAY OTHER FUNDERS, JOURNALS AND UNIVERSITY HAVE SIMILAR POLICIES/GUIDELINES.

BY THE WAY OTHER FUNDERS, JOURNALS AND UNIVERSITY HAVE SIMILAR POLICIES/GUIDELINES.

Open FAIR data is coming !

So if you need to comply with open, findable, interoperable and re-usable data principles, better do it early: it is also an efficient way to work!

Open FAIR data is coming !

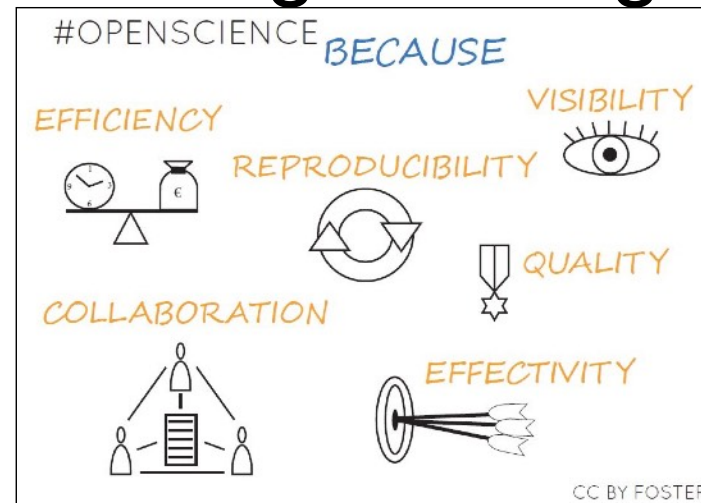

Get ready

So if you need to comply with open, findable, interoperable and re-usable data principles, better do it early: it is also an efficient way to work!

Open FAIR data is coming !
it is a good thing !

Good news #1

Good news #1

**Planning how your data will be gathered, stored and finally shared
will save you (and your team) time !**

Good news #1

you must submit a first
version of your
Data management plan
(as a deliverable) within the first 6
months of the project.

Planning how your data will be gathered, stored and finally shared
will save you (and your team) time !

Good news #2

The data management fairies are here to help!

And you are not alone, at the HU, we have a team dedicated to help you build the puzzle and find the best way to manage your data, trying to find the most efficient way to deal with the question depending on your data and your research.
